

Remote Tab Control - RTC

The newly developed L&W Remote Tab Control (RTC) enables innovative control of the compressor unit via our "My L&W" app and also features a removable 10" tablet. If you like to supervise your filling activities, customize various display options, get information about upcoming service intervals, filter changes or your last fills, by using our Remote Tap Control you are always at the height of your high pressure activities.

Consists of

- » 10" tablet c/w full-HD display (back-up control w/o tablet possible)
- » „My L&W“ app
- » Pressure sensor for auto start / stop operation
- » Sensor for ambient temperature
- » Phase control device
- » Two potential-free contacts for collective fault messages (changeover contact)
- » Potential free terminal for compressor monitoring
- » Emergency stop switch

Features

- » Half & fully automatic operation modes
- » Start & stop pressures individually adjustable
- » Condensate test function
- » Leak test function
- » Safety valve test function
- » Ambient temperature analyses c/w automatic shut down
- » Phase monitoring c/w start prevention
- » Compressor start counter
- » Start- & cycle counter for auto. condensate drain
- » Timer for next condensate drain
- » Graphical representation of machine parameters (Download for 96h via email possible)
- » Widgets for permanent display of four chosen machine parameters
- » Display of fill time [min]
- » Service intervals c/w counter
- » Pin lock (4 safety stages)
- » Dynamic pressure and temperature units selectable
- » Unlimited alarm memory in log data
- » Languages: German / English / French / Italian / Spanish / Russian / Chinese
